- Upraised
Product Management Fellow
Completed in 2021
- PES University
*Bachelors of Technology (Computer
Science)*
Completed in 2019

About Me

Constantly Curious, Eager to Experiment - is how I define myself. I am a Software Developer who holistically evaluates a problem & uses code to implement meaningful & impactful solutions. I believe in 'learning by doing' & try to incorporate this into every aspect of life.

Some of my interests include: Software, Startups, Finance & Grassroot-level problem solving

Professional Experience

Product Management Fellow | Upraised
2022 - 2022

Key achievements:

- Crafted a PRD to improve **Instagram** for Influencers by creating a Creator's Marketplace. Full PRD can be found [here](#)
- Worked on a PRD to increase the number of job seekers applying for a job on **LinkedIn** by integrating Skill Assessments with Job Description. Full PRD can be found [here](#).

Member of Technical Staff | Infosys Finacle
2021 - Present

Key achievements:

- **Designed prototypes & roadmaps** for technical products to improve efficiency, deployment & ease of use
- **Created 2 microservices** from scratch to replace legacy components with the latest features. The prototype is used by **5+ banks**.
- **Re-wrote the Finacle Webapp integration with Scanners** to extend support to all browsers & scanners. Backported to older releases & **used by 6+ banks**
- **Reduced the time taken to test fixes by 40%** by using CI/CD tools & leveraging automation

Product Engineer | Infosys Finacle
2019 - 2021

Key achievements:

- **Owned the Finacle Signature Infrastructure**. Worked with **8+ banks** to address **40+ defect fixes and enhancements** to ensure a seamless go-live.
- **Built & maintained Finacle License Portal** used to generate Developer Licenses. Used by **400+ people** to generate **800+ Finacle licenses**.
- **Aided Finacle deployments** on Cloud by creating foundational artifacts for all internal teams.
- **Continuously re-wrote product documentation** resulting in a **reduction of recurring queries & enabled users to troubleshoot common errors**
- **Led a team-wide upskilling initiative** to encourage upskilling by building small-to-medium scale products. **Built 4+ productivity-enhancing products & processes**.
