○ June 2017 – April 2022

Adobe India

### Computer Scientist, January 2019 – April 2022

- **Product Ideation:** Developed machine learning services to extract meaningful information from a PDF document. The service has been used for 100K+ transactions.
- **Team Leadership:** Led a project to re-write and optimise 19 services, which will reduce the infrastructural cost of the services by 90%.
- **Product Ownership:** Owned and led the Power Automate Integration with Adobe PDF Service

### Software Developer Engineer 2, June 2018 – January 2019

- **Product Development:** Moved the most complex Adobe Sign Service (Customized Email Templates of Adobe Sign) to a new infrastructure seamlessly, 3 months before the schedule, creating a foundational infrastructure migration basis for 10 other teams.
- **Product Optimization:** Optimized Adobe Acrobat PDF Liquid Mode Service, which uses Artificial Intelligence to render documents and today manages more than 2M PDF document transactions per day
- **Mentoring:** Mentored an Intern for 10 weeks and helped her develop an entire service from scratch and present it to Senior Product Managers, Directors, and Vice President of Adobe Document Cloud. The Intern was hired as a Full Time Employee and her project was added in the Product Roadmap.

### Software Developer Engineer 1, June 2017 – June 2018

- **Product Development:** Created a tool that optimized cloud resources creation on Microsoft Azure utilized across 8 developer teams, reducing creation time from 4 weeks to 1 day
- **Stakeholder Management:** Onboarded 8 Adobe Sign Services to Microsoft Azure, which led to \$1.1M deal

## Leadership / Achievements

○ January 2015 - Present
